Thermo King

THERMO KING

<https://europe.thermoking.com/>

Thermo King, a brand of Trane Technologies, pioneered transport temperature control in 1938 and has been world leader ever since.

We move the industry forward with breakthrough technology and innovative solutions. Thermo King's history of innovation permeates our culture and technology, enabling us to be the premier provider in the industry and learn the trust of our customers.

We boldly approach decarbonization strategies. Thermo King delivers a variety of transport climate control solutions that make the world a fresher and more sustainable place.

We are passionate about delivering crucial assets to communities globally and constantly improving how we do it. We keep the industry moving, cut waste, and maximize freshness to ensure people receive what they need most.

Schmitz Cargobull AG

The Trailer Company.

Website: [Schmitz Cargobull](https://www.schmitz-cargobull.com)

Schmitz Cargobull is Europe's leading manufacturer of semi-trailers for temperature-controlled freight, general cargo and bulk goods, and a pioneer in digital solutions for trailer services and improved connectivity. The company also manufactures transport refrigeration units for refrigerated semi-trailers for temperature-controlled freight transport. With a comprehensive range of services from financing, spare parts supply, service contracts and telematics solutions to used vehicle sales, Schmitz Cargobull supports its customers in optimising their total cost of ownership (TCO) and digital transformation. The family-run company employs over 6,000 people and produces around 60,000 vehicles per year, generating sales of around €2.4 billion in the 2023/24 financial year. The international production network currently comprises ten plants in Germany, Lithuania, Spain, England, Turkey, Slovakia and Australia.

Road Freight Marketplace

<https://www.timocom.co.uk/>

The diagram illustrates the TIMOCOM ecosystem. At the center is a circular hub labeled 'TIMOCOM'. Surrounding this hub are ten service icons connected by a network of lines. The services are: Freight (top), Value-added services (top-left), Routes & costs (left), Vehicle tracking (bottom-left), Company search (bottom), Transport orders (bottom), Tenders (bottom-right), Warehouse (right), Live shipment tracking (top-right), and Vehicle space (top-right).

TIMOCOM is a European road freight IT company offering digital solutions that help logistics companies reduce transport costs, optimise fleet utilisation, and ensure timely deliveries.

Exclusively for TRANSFRIGORROUTE members, TIMOCOM has established a closed, free user group. This provides access to over 56,000 verified customer profiles - ideal for finding reliable new business partners. We can show you how it works in Munich.

MANSIO GmbH		
 MANSIO		MANSIO is an innovative network of medium-sized transport companies. It is based on the principle of shuttle transport: trailers are seamlessly transferred from partner to partner along long transport routes. This ensures that transports remain uninterrupted, making them faster and safer. At the same time, trucks and drivers return to their home base at the end of their shift. This allows the vehicles to be used for a second shift and makes the driving profession more attractive.

Mobifreeze mobile ultra-low temperature freezer

Up to -86 °C for optimally temperature-controlled transport. Our battery-powered ultra-low temperature freezer guarantees safe and reliable deep-freezing. The actively temperature-controlled, mobile Mobifreeze ultra-low temperature freezer ensures that the cold chain is maintained in intralogistics and for factory transport in road logistics. Thanks to its excellent insulation properties, the ultra-low temperature freezer is the ideal solution for transporting sensitive and temperature-sensitive substances. Many extremely sensitive samples must not only be stored under validated conditions, but also transported under identical conditions – the ultra-low temperature freezer ensures mobile and refrigerated transport. Find out more at: [Mobifreeze](#)

When I discovered that I could install a Cinderella Travel in my truck, I did so immediately.

Filmdemo: Cinderella Travel – toilet in truck (diesel-powered solution)

The new lorry toilet

Cinderella Eco Sales offers a new way to install hygienic and modern incinerating toilets directly into the standard driver's cab, e.g. under the bunk. Odourless and waterless, the toilets convert waste into ash that can be disposed of easily and without any problems. The toilets are manufactured in Norway and have been in use in other segments for years.

70 Years TRANSFRIGORROUTE THERMOLOGISTICS Summit 2025

October 15-17, 2025
at MAN Truck-Forum Munich, Germany / Booth XX

Inspired by Future. Driven by Technology.

Discover our innovative products and services for connected, efficient and temperature-controlled logistics:

VDO Ecosystem

- VDO Fleet Tachograph Management Platform for efficient and compliant fleet management
- Smart Tachograph (V2) DTCO 4.1a, the first European industrial application to offer secure GNSS functionality for reliable vehicle position data
- New VDO Link: Plug & Play telematics solution connecting digital tachographs with Cloud-based services like Track & Trace
- New VDO Fleet App for easy fleet management from your mobile device
- And many more solutions that improve safety and comfort for drivers, e.g. driving and working lights, radar sensors or surround-view camera systems

We are looking forward to welcoming you at TRANSFRIGORROUTE THERMOLOGISTICS Summit 2025 in Munich!

EKF Finanz Frankfurt GmbH

<https://www.ekf-frankfurt.de/>

EKF is a factoring provider that offers personalised advice to its customers. This means that we do not offer standard solutions, but tailor our services to the requirements of our customers. This works best through dialogue and requires an individual situation analysis at the beginning of the collaboration. On this basis, we find solutions that work for both sides and prove themselves in the long term. It is precisely this way of working that sets us apart.

KRONE Cool Liner with Thermo King Advancer A-500e AxlePower

...a fully electric cooling system with BPW ePower generator axle and battery pack (underfloor). Intelligent energy recovery during driving supplies the refrigeration unit with power, meaning that it does not require a diesel engine. With zero emissions during cooling operation and a significantly reduced noise level, this system is ideal for night-time deliveries in city centres and for the driver's well-being during rest periods.

A lighter front wall unit and the positioning of the battery pack under the body result in further advantages in terms of load distribution – especially with partial loads.

KRONE Cool Liner Multitemp – exceptional flexibility for multi-chamber transport: The evaporators can be positioned freely and the new ATP-tested cross partition with balancer technology allows the body to be divided individually and adapted to a wide range of temperature zones in a user-friendly manner.

Further innovations ensure maximum efficiency, safety and hygiene in refrigerated transport: an optional swivelling baffle plate, LED interior lights, outline brake lights, optimised door seal and HACCP-compliant double-deck/lashing rail system, modular impact protection concept adaptable to various applications.

	Vector® HE 17 Trailer-refrigeration-unit
 TRANSICOLD  VECTOR HE 17 https://www.carrier.com/truck-trailer/de/de/	 Efficiency in motion, trailer refrigeration redefined The Vector HE 17 is the new refrigeration system from Carrier Transicold, which reduces fuel consumption by up to 30% compared to its predecessor, the Vector 1550, while offering outstanding cooling performance. Thanks to inverter technology combined with the proven fully electric E-Drive architecture, this new unit has one of the best total costs of ownership in its category. With its reduced noise level, the Vector HE 17 is the ideal solution for long-distance transport and urban deliveries. The Vector HE 17 is designed to offer compelling total cost of ownership benefits. Its improved fuel efficiency leads to significant long-term savings and reduced operating costs. This efficiency provides a tangible competitive advantage by minimising fuel costs, increasing profitability and ensuring more sustainable operation with a reduction in carbon dioxide compared to its predecessor, the Vector 1550.
